The Air Force and the CIA are accused of covering up UFO reports.

The Central Intelligence Agency and the Air Force conspired to cover up surveillance of military bases by unidentified flying objects, according to William H. Spaulding, director of Ground Saucer Watch, a UFO study group. Spaulding says he can back his allegation with 1,000 pages of documents obtained last month from the CIA through a Freedom of Information Act suit. "We have information to categorically prove the government is lying and that significant findings have been suppressed," said Spaulding, a Phoenix, Ariz., aerospace engineer.
